

New Product. For Immediate Release: May 14, 2010

M11X 2500mAh 7.4V LiPo TX Battery

Reedy's all-new high-capacity 2500mAh 7.4V LiPo battery lets you enjoy the LiPo advantage in your Airtronics/Sanwa M11X radio. The Reedy #637 fits neatly into the transmitter's battery holder for simple plug-and-play installation. Because it is lighter than the standard NiMH battery, the radio is less tiresome to hold during long main events or practice sessions. Plus, less weight makes the transmitter easier and less costly to transport from race to race.

Reedy LiPo batteries improve performance so that you can better enjoy your racing experience.

UPC: 784695 006379	#637	M11X 2500mAh 7.4V LiPo TX Battery	\$51.99	Available: In Stock
